

FP7 INFO-DAY "HEALTH"

Project Market Place for health projects

As part of the info-day, a Project Market Place will be held in the afternoon on 15 February 2007.

The concept of the Project Market Place is to organise discussions of project ideas in an informal setting. This should result in creative ideas and partner identification.

The Market Place is organised as a number of small, informal groups, each led by one person (Group Leader), who has taken the initiative to debate a certain topic/project idea. The topics/project ideas are decided beforehand, and this profile is designed to collect information on potential topics to be discussed and identify Group Leaders. A moderator will also be available at each table to see that the discussion runs smoothly.

The Market Place begins with a very short presentation to all seminar participants of the project ideas by each Group Leader. Each Group Leaders will be leading a different table. The other participants will be then distributed around the tables according to the interests they provided us with in their participant profiles.

Participant profile to the Market Place for health projects

I am willing to present a project idea and to lead discussion on the subject during the Project Market Place in the afternoon (tick the box):

YES
NO

If yes complete point 1 and point 2,
If you do not have a specific project idea but you want to attend the market place then go directly to point 2

1. If you have a topic/project idea that you would like to invite seminar participants to discuss during the Project Market Place, please complete this form with the following details:

Marketplace for Health projects

Which of the following topics is most relevant to your proposal?
